PROFESSIONAL SUMMARY

Master of Financial Engineering graduate with experience in investment analytics and financial data integration at Momentum Investments. Skilled in Python, SQL, econometrics, time-series analysis, and quantitative risk assessment. Experienced in investment holdings data transformation, data quality assurance, portfolio performance attribution, and quantitative research. Interested in applying statistical modelling and data-driven methods to investment analysis, risk management, and portfolio construction.

PROFESSIONAL EXPERIENCE

Financial Data Integration Specialist | *Momentum Investments* | *Pretoria* | *May 2026 - Present*

- Integrate investment data holdings from financial institutions into the organisation's data lake using standardised ASISA formats.
- Perform data quality assurance, validation and reconciliation; investigate discrepancies and support accurate downstream reporting.
- Improve data preparation and validation of about 75% of workflows, and document source specifications, transformation rules and integration procedures.
- Coordinate with financial institutions and internal stakeholders to resolve data issues and support reliable data integration.

Investments Intern | *Momentum Investments* | *Pretoria* | *Feb 2025 - Apr 2026*

- Supported investment decision-making through portfolio analysis, performance attribution, data validation and investment reporting.
- Monitored portfolio risk and exposures and contributed to research and quantitative analysis initiatives.

Academic Tutor - Economics & Econometrics | *University of Johannesburg* | *Feb 2023 - Nov 2025*

- Supported students with econometric modelling and data analysis using Stata, R and Excel; achieved 95% positive teaching feedback.
